

Be Welcoming to LGBT People

New Required LGBT Training

Starting Jan. 1, 2018 regulation 22 C.C.R. § 7725217 Staff Development requires that each skilled nursing facility regulated by the California Department of Public Health must provide bi-annual training on working with LGBT people.

Who is mandated to take the training?

All registered nurses, licensed vocational nurses, certified nurse assistants, and medical directors.

By when must the facilities be in compliance?

August 1, 2018, and ongoing beyond that date.

How can we comply?

SAGECare's "Creating Inclusive Communities for California's LGBT Older Adults" satisfies the specific requirements of this regulation and is available as an on-demand video or can be uploaded to your facility's learning management system, giving your staff the flexibility to complete the training individually or as a group.

What else comes with this product?

After purchase, your facility will have access to a sign in sheet, handouts, discussion questions, certificate of completion, and a FAQ to help facilitators answer questions from staff.

Completing this training can also earn you a SAGECare Credential.
